Wilton weaving stone

Dear customer,

Thank you for your interest in our products.

Since its foundation in 1956, B.I.C. carpets provides a tailored, individual service and offers **quality, flexibility and sustainability** for its customers worldwide. Our carpets can be found all around the globe, from embassies, hotels, executive offices and luxury yachts, to the most exclusive residences.

Wilton weaving is one of most traditional ways of making durable luxury carpets on machine driven looms. Based in **Belgium**, the center of the textile business, BIC Carpets serves many clients worldwide through an extensive network of agents, importers and selected dealers.

Next to that, BIC carpets offers luxury handtufted rugs.

A modern approach to the tapestry arts, handtufting results in a high quality rug of excellent appearance and touch. Versatile on design and finishing choices, it is often the solution for interior designers and decorators to embellish the floor of their projects. Choose your design, pattern, motif, style, composition, shape, colour, feeling and we will make your carpet to measure.

Looking for inspiration?

Request our **designbook** or take a look on our **website**.

Do you have any questions?

Would you like a BIC update? Contact us via sales@bic-carpets.com or by phone on +32 56 23 54 10.

One last point:

Are you already following us on Facebook - Instagram? This way we stay in touch and you will get to see all novelties first.

Kind regards,

The B.I.C. Carpets team

01 About

B.I.C.-Carpets is recognised internationally for creating high quality and beautiful bespoke carpets in the world of custom Wilton weaving.

DREAM BIG, THINK BIC

B.I.C.-Carpets has always invested in the search for carefully crafted carpets that can answer to the needs of every generation. As a result our strength lies in using natural materials that can last up to a lifetime.

Our continuous search to be innovative is what makes us who we are today, offering you versatile and iconic carpets. We aim to provide our customers with qualities that match their projects with conviction.

Ecological mission

We have developed our own ecological label to contribute to the ecological revolution. Our commitment to these ecological values & philosophy is as important to us as they are to our customers. At B.I.C.-Carpets we strive to meet the environmental regulations that protect the health and safety of our planet. We are committed to reach our goals of improvement concerning reducing the waste of our production process, our choice of ecological resources, our contribution to natural power sources, etc.

OUR MISSION

We aim to take your interiorproject to the next level through meaningful design that also meets the environmental statements.

We are committed to the highest standards of quality, an aesthetic approach to materials combined with strict adherence to ecological requirements.

B.I.C. carpets is committed to providing a customized, individual service that offers value to its customers around the world. The search for new possibilities in yarns, weaves and colors is part of the daily business.

Years of craftsmanship have led to our choices of natural and sustainable materials to deliver a product that can last a lifetime. Our company's mission is to be the "renowned expert in creative and high-end solutions for woven floor coverings."

OUR EFFORTS, EXPLAINED

Over the years we have booked several results from our efforts to contribute to the sustainability of our company. Just a few listed here:

1. BIC Carpets production sites are all based in Europe, more exactly in Belgium and Portugal. This is a well-thought choice, as we have more certainty with regulations towards human rights & labour conditions. Next to that, we keep our transport costs to a minimum as we ship all carpets from Belgium, known as the center of Europe. BIC Carpets tries to lower the ecological footprint as much as possible.

2. More than 90% of the BIC Carpets suppliers are based within Europe. These are carefully selected and most collaborations have been going on for years now. The suppliers are questioned about environmental impact and their

respect for nature, animal welfare & sustainability.

3. We have developed several carpet qualities that contain ecologically responsible materials, such as wool, regenerated nylon & cotton. For instance our qualities Magic and Harbor are made from polyamide 6 yarns which can be recycled into new resources.

4. Our solar panel system installed on our production site has generated 423 635 kWh in 2020". 25% of this was used by our own production while the remaining part was injected into the net. We also invested in LED lights throughout the production site to reduce energy loss.

5. Our contract qualities have been certified by Centexbel regarding

that they fulfill the A+ criteria for their VOC levels and VOC substances of newly placed carpet to ensure the air quality of new projects.

6. We make sure all of our waste is sorted in separate containers according to the waste type. Wood pallets are collected and recycled by Geldof. We also reduce the amount of carpet cut-off leftovers by re-using most pieces to cut out carpet samples instead of wasting them.

7. We have local partnerships which we collaborate with to re-use waste, for instance by assembling a new carpet with leftover pieces by using a seam, or using a small part of carpet as a cover for a chair.

Blitz

The Blitz collection is made of polyester, which by nature has a high luster appearance. This translates into luxury carpets of 8 vibrant colors. Due to its lustrous appearance and high level of stain resistance, polyester is a popular choice. Next to its velvety softness which is highly comfortable beneath the feet, it also feels lush and delivers a lovely sense of luxury.

Meet Holden - Harbor - Haven

Embracing our earthly home

We present you an eco-friendly choice in floorcovering, without any sacrifice towards beauty, design & softness.

Let us take you to the beach, with our 8 natural colors, that each represent an element you can find at the shore...

Are you ready to bring nature into your home?

Think about:

Did you know, that if we continue to live and waste like this, by 2050 there will be more pollution in the ocean than fish? At **B.I.C.-Carpets** we strive to meet the environmental regulations that protect the health and safety of our planet. These cradle to cradle carpets are part of a renewed eco-responsible mindset, so to keep this planet a safe haven for this generation and others to come.

Miro

BIC Carpets MIRO collection is born. The inspiration for this collection comes from ancient history, the Maori people, who's word for cotton was 'miro'. Maori you say? Well, these were the first inhabitants of New-Zealand. And guess were the fine wool that was used for this collection comes from? Yes, New Zealand. We honor their heritage alive with the luxurious MIRO carpets, gentle on the feet and made with the best natural materials.

INSPIRED BY NATURE

Nature as a source of inspiration

The story began in 1976 when Lucien Vlerick, the president of B.I.C.-Carpets at the time, was struck by the magic of the cobble stoned streets in the Greek Archipelago islands. These soft-hued, gently-rounded uneven stones later became the inspiration for an icon in the flooring world: the B.I.C. STONE carpet.

STONE AT THE MOMA

Stone at the Museum of Modern Art in New York

18 November 1985 marks a very special day for B.I.C.-Carpets. It was on that day that Arthur Drexler, the Director of the Museum of Modern Art in New York, announced the entry of the Stone into the Museum's permanent collections. 'Stone' got the recognition it deserved.

Available from Concepts International, Stones is now a part of New York's Museum of Modern Art's permanent Architecture and Design Collection.

NEW YORK—The Museum of Modern Art, here, has selected a wool rug for its permanent Architecture and Design Collection.

The rug, Stones, has a highly accented texture woven from felted wool yarns by B.I.C., Belgian International Carpets.

It is available from Concepts International in three rug sizes plus specials, and 6-foot, 7-inch wide broadloom in four earth colors.

Gradient Lyocell

Gradients offer a wide variety to choose from. Enjoy the magical visual effects of 100% lyocell. Gradient lyocell is a unique carpet that enhances your interior projects with its brilliance. Lyocell is made from a sustainable nature-based cellulose fiber, in this case wood chips from the eucalyptus tree. This gives the fiber the cool feel of linen in the summer and the pleasant warm feel of wool in the winter.

07 The BIC Designbook

B.I.C.-Carpets has always invested in the search for carefully crafted carpets that can answer to the needs of every generation. As a result our strength lies in using natural materials that can last up to a lifetime.

Our continuous search to be innovative is what makes us who we are today, offering you versatile and iconic carpets. We aim to provide our customers with qualities that match their projects with conviction.

NEW!

THE DESIGNBOOK BY B.I.C. CARPETS

The designbook by B.I.C. Carpets is a contemporary and inspiring array of designs for anyone with a passion for interior and tapestry.

On the one hand, it aims to show **the extensive creative possibilities of our handtuft collection** to be a source of inspiration to architects and interior designers.

On the other hand, **each design of this collection can be ordered by our B.I.C. lovers**. Colors can be adjusted on request from the wide color range.

Our request? **Tell us your imagination and we design it together with you!**

**"In crafting there are no mistakes,
only unique creations"**

Architecture of life

A modern set of geometric and sleek stylized designs in neutral and soft colors... Are you looking for that little bit more? This selection also harbors a range of black and white cartoons to fine line drawings.

Colony of the earth

A colonial chic collection in a range of rich terrestrial tones, gentle on the eye and gentle on the feet. head to toe inspired by the crafts of nature alongside with the artistic interpretation of different warm cultures.

Riches of time

Wisdom comes with the years? Yeah, affirmative. Beauty deepens with time? Absolutely. Come here for the profound colors of life and the richness of the classics, all dressed up to shine like stars.

Paradise of heaven

Paradise of heaven stands for paradisiacal designs of fauna & flora and heavenly playful designs in sparkling colors. The child in us came to the surface when this collection was born.

But what is a **handtufted** rug?

The handtuft technique establishes high quality and offers endless possibilities in design.

All kinds of textures, such as different heights by shearing, cut vs loop pile and carving can be applied.

Carving can establish a 3D effect for your carpet.

You can use a pattern, but you don't have to, the choice is totally up to you.

The creation of your handtufted carpet begins with an **idea, a choice in material and a color palette**. That's all you need.

B.I.C. Carpets turns your idea into a proposal, after discussing all the requirements and possibilities in order to produce the final design artwork. If necessary, we adjust until it fits your needs. The design is approved?

Then it's time to tuft.

The entire artwork is printed onto a canvas that is stretched tight on a frame. Complex designs are drafted by hand on the canvas, by projecting from the screen on the canvas. A sure sign of craftsmanship, right?

With a special compressed air gun the tufters shoot little U-shaped tufts of **wool, fine wool or lyocell** through the cloth, filling the pattern with the right colors. Sometimes, also the robot is used to create a part of the design.

This tufting gun is fitted with tiny scissors to determine the pile height. After the design is complete, the **backing** is applied to the carpet and it's time to dry. To finalize the piles are sheared to the required height and the finishing touch is done by hand. All **carving** gets done manually.

Your carpet is ready for departure and on its way to turn your house into a home.

Time to design, let's put handtuft into practice

Step 1: collect as much information as possible from the client

- color palette
- moodboard or inspiration
- dimensions
- choice in material: wool - fine wool - lyocell - combination
- required pile height: Please note that for handtuft, we need a minimal 10 mm height
- use: residential use - commercial use - high traffic use

Step 2: request your render

Contact us by sales@bic-carpets.be or through your known B.I.C. Carpets contact person. We will send you the requested render within 5 working days.

Do you have a big project coming up? To assist you in the best possible way, please involve us in an early stage. This way we can help you further with all technical information, seams etc..

Step 3: approval of the render

After receipt of the first proposal, you can require amendments or send us your approval. Please note that handtufted rugs are always produced upon order and have a lead time of 6 to 8 weeks.

Step 4: congratulations, you receive your unique handtufted rug.

Please unroll the carpet within 1 week of receipt to avoid bowing and carefully read the inclosed cleaning & maintenance instructions. You can always find these on our website as well.

Step 5: enjoy :)

**“In crafting there are no mistakes,
only unique creations”**

Cleaning & maintenance

Important information

Regular maintenance

Carpets and rugs bearing the B.I.C. Carpets label make a statement about your sense of style and value. And whether you choose a carpet for its quality, durability or beauty, you can maintain its hard wearing, long lasting good looks by remembering to:

- **Vacuum regularly**
- **Remove spills immediately**

Vacuuming

Regular and thorough vacuuming once a week (more often in heavy traffic areas) is an economical and effective way to remove soil and dirt particles before they become embedded into the pile of the carpet. For best results, empty your vacuum bag when half full.

Do certainly not use a vacuum cleaner with a brush.

Periodic maintenance

Thorough cleaning is required periodically to remove the deepest soil. There are many deep cleaning methods you can use to ensure the beauty and life of your carpet or rug. When having your carpet professionally cleaned, use a reputable company and check references.

without brush ✓

✗ with brush

clean with a damp cotton cloth ✓

✗ with rotating brush

To protect your carpet from the B.I.C. Carpets collection, it's very important to do a periodic maintenance. In this way you'll keep your carpet in good shape. The life of your carpet will increase significantly by cleaning your carpet at regular intervals.

Don't wait until your carpet is seriously soiled.

You can consider that extending the life span of your carpet will be the perfect return on investment. Properly maintained carpets enhance the appearance and atmosphere of an interior, at home and in the project environment.

A well cared carpet absorbs dirt, dust particles from the air, smoke and noise. It provides a hygienic interior. Maintenance makes sense. A simple maintenance program including regular, interim and periodic cleanings will keep your carpet looking as good as the day it was installed!

Preventative measures

- Place absorbent mats at entrances to your home; change or wash when dirty.
- Regularly change filters in your heating and air conditioning systems.
- Periodically clean traffic lanes and in front of frequently used chairs with an absorbent powder.
- Do not apply stain repellent treatments containing any silicone, because they tend to accelerate carpet soiling.

Finishing

How will the finishing of my new carpet look?

Did you know that all our finishing is done by hand? Craftmanship at it's finest.

For **wilton woven** qualities: Atrar – Blitz – Chelha – Galaxy – Harbor – Haven – Holden – Heritage – Impulse – Isul – Luna – Magic – Nature – Nautilus – Pavé berberi – Pavé the luxe – Siwa – Softline – Stone – Tosh

Finishing: **American border**. Color of the border in accordance with the color of your carpet. Depending on the height of the quality, this will be visible.

For **handtufted** qualities: Brick – Club Design – Flow – Fly (Mesh) – Gradient Lyocell – Gradient Fine Wool – Gravel – Grid – Mecca – Medina – Parker – Queen – Royal – Shadow 2.0 – Trinity – custom design projects

finishing: **black invisible border**
